## L-42- Valuation Basis (Life Insurance) as at end September 30, 2022

Name of the insurer :- ICICI Prudential Life Insurance Co. Ltd

### 1. Data

Policy data is extracted from policy administration systems and checks are carried out to ensure completeness and accuracy of data.

### 2. Treatment of valuation parameters

The liability valuation calculations have been carried out using an actuarial software. Assumptions for each plan are updated in the model. Specific characteristics of each policy such as age at entry, sum assured, term, etc. are either directly obtained from data or calculated within the model.

### 3. Valuation method –Methods adopted in the determination of mathematical reserves

In general the method of valuation is the gross premium valuation. The reserve held represents the net present value of benefits and expenses less premiums. The reserves are calculated on a per policy basis. Any negative reserves are zeroised, so that a policy is not treated as an asset. The minimum value of reserves is the higher of guaranteed surrender value, non guaranteed surrender value, and zero.

The following sections contain specific details about reserving for different lines of business.

#### Non-participating business

Contract status	Category	Applicability	Method
In-force	Individual products	Base plan	Higher of the gross premium valuation (GPV) reserve and surrender value (if applicable) and zero
		Riders	Higher of GPV reserve and unearned premium reserve (UPR) on a policy basis
	Group products – non-participating	All group risk products, except group term with duration less than or equal to one year, and group fund based savings product	Higher of GPV reserve and Surrender value (if applicable) or zero
		Group term with duration less than or equal to one year	Unearned premium reserve
		Group savings product (non-variable)	Policy account value is held as reserve

Contract status	Category	Applicability	Method
		Group variable life and pension	Policy account value is held in addition to general fund reserve
Reduced paid up	Individual products	Base plan	Higher of GPV reserve or surrender value on reduced benefit with no future premiums payable
Lapse reserve	Individual products	Base plan	Reserve for expenses till the end of the revival period
Lapsed/reduced paid up, in respect of those that are expected to revive	Individual products	Reinstatement reserve	Reinstatement rate is applied to the difference between (A) & (B) where,  (A) = the reserve assuming contract is In force and (B) = the revival premiums minus commissions payable plus the paid-up/lapsed reserve,  Subject to a floor of zero.

### Participating business

Contract status	Category	Applicability	Method
In-force	Individual products	Base plan	Higher of the GPV reserve and surrender value (if applicable) and zero, with allowance for future bonus and associated tax and transfers to shareholders
		Riders	Higher of GPV reserve and UPR on a policy basis
	Group products – participating	Base plan	Higher of the GPV reserve with allowance for future bonus and associated tax and transfers to shareholders and face value of liability
Reduced paid up (all)	Individual products	Base plan	Higher of GPV reserve or surrender value on reduced benefit with no future premiums payable
Lapse reserve (all)	Individual products	Base plan	Reserve for expenses till the end of the maximum revival period

Contract status	Category	Applicability	Method
Lapsed or reduced paid up, in respect of those that are expected to revive	Individual products	Reinstatement reserve	Reinstatement rate is applied to the difference between (A) & (B) where,  (A) = the reserve assuming contract is In force and (B) = the revival premiums minus commissions payable plus the paid-up/lapsed reserve,  Subject to a floor of zero.

### Unit linked business

Contract status	Category	Applicability	Method
In-force premium paying/ premium holiday	Unit reserves	Unit fund	The unit reserve is the number of units held by the policyholder multiplied by the NAV at the valuation date.
	Non-unit reserves – except for group linked	Life cover, rider benefits and adequacy of charges to cover expenses	For base policy and associated mortality benefit we take the higher of the unearned risk benefit charges and all the projected cash flows.  We allow for zeroisation under all contracts at a policy level, so that credit is taken for future positive cash flows only to the extent that they offset subsequent negative cash flows. For riders a higher of GPV reserve and UPR on a policy basis
Lapsed	Unit reserves	Unit fund	Paid up/surrender value to the credit of the policyholders
		Reinstatement reserve	A reinstatement rate is applied to the difference between the full unit value and the paid up/surrender value. We adjust this reserve for death benefits payable prior to revival or foreclosure.

Contract status	Category	Applicability	Method
	Non-unit reserves	Adequacy of charges to cover expenses during the maximum revival period.  Reinstatement reserve	Projected cash flows as for in-force contracts allowing for zeroisation. The cash flows do not include cost of insurance charges and claims outgo.  For pre-September 2010 policies Reinstatement rate is applied to the difference between the reserve assuming contract is in force and the charges on outstanding premiums and non-unit reserve.  For post-September 2010 policies the reinstatement reserve is calculated by allowing for refund of surrender penalty, levy of back charges, release of lapsed non-unit reserve and setting up of in-force non-unit reserve, all multiplied by probability of revival, subject to a floor of zero.

#### Unit Linked business (continued)

Contract status	Category	Applicability	Method
Group linked	Non-unit reserves		No reserves are held on account of expenses as charges are currently higher than expenses and expected to remain so.  In case of mortality benefits, unexpired risk premium is held.

#### 4. Bonus rates for participating policies

The current year declared reversionary and terminal bonuses and historical reversionary bonus rates given in Annexure I.

##### 4.1. Policyholders' reasonable expectations (PRE)

Due consideration is given to the reasonable expectations of policyholders when making a distribution of surplus. "Reasonable" is not explicitly defined in the regulations and is left to the interpretation of the Appointed Actuary. Our interpretation of "Reasonable" refers to a well-informed, financially literate policyholder.

The main drivers of PRE are currently our point of sale material, the bonus rates declared last year and past communication with policyholders.

##### 4.2. Taxation and shareholder transfers

The gross premium reserve (GPV) includes reserve for transfer and tax. Tax is provided on surplus emerging under participating products. For the current valuation, we have assumed that the participating pension business is tax exempt. However, our

interpretation of PRE would be that future bonuses would in any case reflect the taxes charged to the fund. As a result, the reserves would not be changed even if taxes came to be charged.

#### **5. Valuation assumptions**

Valuation parameters are set prudently and include margin for adverse deviation (MAD) as required under APS7 issued by Institute of Actuaries of India.

The range (minimum to maximum) of parameters used for valuation for individual and group business as at 30<sup>th</sup> September 2022 are given in Annexure II and Annexure III respectively.

#### **6. Reserves for incurred but not reported (IBNR) claims**

IBNR reserves are required for claims which may have been incurred at the valuation date but which have not been reported to the company. IBNR reserve is held for all group and retail protection products.

9-Aug-22	United Spirits Ltd.	AGM	MANAGEMENT	Approve sale of 32 brands for a consideration of Rs 8.3 bn and grant of franchise of 11 brands for five years to Inbrev Beverages Pvt Ltd with the option to convert the franchise agreement into an arrangement with perpetual right to use or outright acquisition of the brands	FOR	ABSTAIN	IIAS has noted that in the case of franchised brands the absolute royalty amount cannot be accurately determined and hence it is unable to arrive at the actual consideration for the sale/franchise arrangement. Further, based on the consideration disclosed, the valuation of the divestment portfolio is lower than the industry peers The company has not disclosed the valuation report in the public domain.  The company has stated that they have followed a thorough process over 18 months while selecting the final bidder, an unrelated third party. The company has also obtained a fairness opinion from a leading global investment bank as a good governance practice and presented it to the audit committee and the board of directors (comprising a majorly independent directors) which approved it. The royalty under the fixed term franchise agreement is similar to other arrangements by USL that are currently in force.  We believe that sale of popular brands transaction is in line with company's long term strategy to premiumize the portfolio and exit non-core part of portfolio to deliver long term profitable growth.  In view of the above we abstain from voting.
